

Jdey Iheb

FULL-STACK SOFTWARE ENGINEER | Node.js • React • Flutter

ihebjdey2@gmail.com +216 58 130 488 Tunis, Tunisia ihebjdey.tn
 Jdey Iheb ihebjdey2

PROFESSIONAL SUMMARY

Software Engineer specializing in Full-Stack development with hands-on experience in Node.js, Express.js, React, MongoDB, and Flutter. Passionate about building high-performance web and mobile applications, developing secure REST APIs, and applying collaborative software development best practices.

KEY SKILLS

Back-End Technologies

Node.js, Express.js, REST APIs, WebSockets, Spring Boot, Flask, ASP.NET

Databases

PostgreSQL, MySQL, SQL Server, MongoDB, Firebase, PL/SQL

Programming Languages

JavaScript (ES6+), TypeScript, Dart, Java, Python, C, C++, C#, SQL

Machine Learning

TensorFlow, PyTorch, Scikit-learn, OpenCV

Front-End Technologies

Angular, React, HTML5, CSS3, Bootstrap, Tailwind CSS, Flutter, Vue.js

DevOps & Tools

Git (GitHub, GitLab), Docker, Jenkins, SonarQube, Prometheus, Grafana, Jira

Architecture & Methodologies

Agile, Scrum, UML, REST API Design, Microservices Architecture, MVC/MVVM Architecture, CI/CD, Code Review, Clean Code

PROFESSIONAL EXPERIENCE

Full-Stack & Mobile Developer Intern — Final Year Project

INVEEP

01/2025 – 06/2025

Les Berges du Lac 2,
Tunis — The Dot

Project: TUNGO — National Intercity Transportation Platform for shared taxis, buses, and trains

Technologies: Node.js, Express.js, React, HTML5, CSS3, JavaScript, Flutter, PostgreSQL, JWT, Git, Docker, Jenkins.

- Engineered and implemented secure REST APIs for bookings, parcels, route management, schedules, and user authentication.
- Built responsive React administration dashboards and cross-platform Flutter applications for passengers and drivers.
- Developed and integrated a Retrieval-Augmented Generation (RAG) chatbot to provide context-aware assistance using application-specific knowledge.
- Applied PostgreSQL database operations, JWT authentication, and role-based access control to ensure secure and reliable data management.
- Optimized API endpoints and database interactions to improve application performance and responsiveness.
- Collaborated using Git, Docker, Jenkins, testing, debugging, code reviews, and Agile development practices throughout the software development lifecycle

Mobile & AI Developer Intern — Engineering Internship

SOTUDEV

09/2024 – 11/2024

Les Berges du Lac 2,
Tunis — The Dot

Project: Intelligent Mobile Application for Farmers

Technologies: Flutter, Node.js, Express.js, REST APIs, MongoDB, TensorFlow, OpenCV, Git.

- Built a Flutter application that centralized agricultural services and improved user accessibility.
- Built REST APIs with Node.js and Express.js and managed application data with MongoDB.
- Integrated TensorFlow and OpenCV for image-analysis features and validated the application through testing.

Machine Learning Intern

ESPRIT

06/2023 – 08/2023

Tunis, Tunisia

Project: Predicting the Success of New Products Based on Customer Feedback

Technologies: Python, PyTorch, OpenCV, Machine Learning.

- Prepared and analyzed customer-feedback data for product-success prediction.
- Trained and compared machine learning models using PyTorch.
- Documented the data-processing pipeline and experimental results.

Full-Stack Developer Intern

Tunisie Telecom

06/2022 – 08/2022

Tunis, Tunisia

Project: Full-Stack Web Platform Development

Technologies: React, Node.js, Express.js, REST APIs, Git.

- Developed a Full-Stack web platform using React, Node.js, and Express.js.
- Created REST APIs and implemented authentication, authorization, and role-based access.
- Tested, debugged, and documented the application to support maintenance and handover.

EDUCATION

Engineering Degree in Software Engineering

ESPRIT

2021 – 2025

Tunis, Tunisia

Preparatory Cycle for Engineering Studies

Faculty of Sciences of Sfax

2019 – 2021

Sfax, Tunisia

PROJECTS

Multiplayer Mobile Game

12/2023 – 05/2024

End-of-Year Project: GamiX Integration Project

- **Back End:** Built a Node.js back end to manage users, game history, and inventories with MongoDB.
- **Gameplay and Animations:** Programmed gameplay mechanics, animations, audio and graphics settings, a lobby, and a complete game menu using Unity and .NET.
- **Multiplayer Synchronization:** Synchronized players and task progress using Netcode.
- **UI/UX:** Designed an intuitive user interface to provide smooth navigation and an immersive experience.

Technologies: Node.js, MongoDB, Unity, Netcode, .NET.

Full-Stack Project — Loan Management System

10/2023 – 02/2024

- Architected a microservices-based application using Angular, Spring Boot, and Docker, with continuous integration through Jenkins.

Technologies: Angular, Spring Boot, Docker, Jenkins.

Cross-Platform Clinical Management Application

01/2023 – 05/2023

End-of-Year Project: Web and Mobile Integration Project

- Created a cross-platform application for web, desktop, and mobile using JavaFX, Symphony, FlutterFlow, Firebase, and Git.

Technologies: JavaFX, Symphony, FlutterFlow, Firebase, Git.

LANGUAGES

English: Professional working proficiency | **French:** Professional working proficiency | **Arabic:** Native proficiency

ORGANIZATIONS

IEEE RAS Chapter - ESPRIT Student Branch

2021 – 2022

Member

Contributed to event organization and management, represented the chapter as an ambassador, and participated in the TSYP conference, where the team won first place.
